SUBJECT: Statement World Economic Forum January 22—25, 2019, Davos, Switzerland

REFERENCE: <http://www.crxjemconsult.com/VBooth/RochesterNYEconDev.html>

Hello,

AS the United States Federal Government is closed, soon reaching the 30 day mark, 1 month out of 12 month calendar year, with Congress and President unwilling to work to open, the World Economic Forum (WEF) meeting starts on January 22, 2019, one day after US Federal Holiday Martin Luther King Day. Named for an American who spoke about economic justice. Historians may agree that on January 21, 2019 a date can be assigned to end of “The American Century” begun at the turn of 1900’s and after World War I. Even though officially America will not be attending WEF 2019 in Davos, Switzerland, that does not mean we are out of the game.

This does not mean Americans’ are no longer engaged in the world or out future. This does not mean the down payments American’s have died for and sacrificed from 1776 onward are the last the world will hear from us. It only means some of processes of governing and democracy needs to change. In 2026 the United States will celebrate the 150 years since the signing of the Declaration of Independence in Philadelphia, Pennsylvania. A new generation of Americans will be taking up the calls for a new and better world looking towards the future, not the past. As we Americans move to 2030 we know the challenges are there and we understand the lack of leadership.

IN 2019, a mere 11 years after what has been generously labeled “2008 financial meltdown”, the world has fewer and fewer looking to lessons of capitalism in light of a multipolar world. Monopolies are stifling innovation while governments are unable to act as stagnation grows. Tired old ideas have been led to their logical conclusions with expected results.

Yet the American adage that once you hit bottom you can only go up reminds everyone that American’s own their own destiny. IN the winter of 1777 in Valley Forge, Pennsylvania, a fledging army with the first future President, faced the world’s most experienced, well supplied, and best military leadership in the world, the British Army. No rational person would reasonable assume that once the British had captured Philadelphia, at that time the capital of the newly formed United States of America, this Army led by George Washington, ill equipped to the withstand a brutal winter, could possibly survive or even win. A French man named Marie-Joseph Paul Yves Roch Gilbert du Motier de Lafayette, know as Lafayette, was there that winter of 1777. He knew the challenges yet stayed. What did Lafayette, a French nobleman see that winter of 1777 in Pennsylvania that made him stay?

Today American's face larger challenges both home and around the world. In 1968 American's gave the world a view from Apollo 8, Earth rise over the Moon, and humanity was never the same. A year later Neil Armstrong walked on the Moon, and returned safely to Earth as tasked by President John F. Kennedy, nearly a decade prior stating; "We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win, and the others, too." Unlike 1777 and 1968, America has the largest resource of untapped human capital in world history. From cities to rural wilds and in between. American's only lack leadership but we still do not lack the will or vision of "Life, Liberty, and Pursuit of Happiness".

We recognized our leaders have failed us. We recognized the limits of our understanding of intelligence. We understand our leaders do not come from a vast majority or experience, but from narrow sections of small groups that don't reflect the majority. We know leaders come not from "boom times" but forged from trying times. We know ideas come from anywhere, anyone, at anytime and recognize the limits of financial capital. We know the limits of our governments, business's, and non profits. We know the future is made by us.

What we do not know is what the future will be like?

As WEF starts on January 22, 2019, while we American's may not be physically there, but like the winter of 1777 in Valley Forge, we American's can imagine us there in Davos, Switzerland. We will be listening and engaging with the world, so don't forget about us. We will partner with you. We are here and thinking of the FUTURE!

FOR PUBLIC RELEASE

Friday January 18, 2019, 12 PM EST.
